25X1A

1. It was observed on 15 December 1950 that a single-track railroad bypass was under construction between Grossbeeren (N 53/Z 73) and Schoenefeld (N 53/Z 93) via Mahlow (N 53/Z 83). The bypass parallels the Brossen (N 53/Z 91) - Mittenwalde (N 53/Z 92) - Koenigswusterhausen (N 53/V 02) railroad line.
2. On 16 December 1950 excavation work was underway for a railroad overpass near Mahlow, and for a bridge across Reichsstrasse (highway) No 96. The work observed is connected with the construction of a new line between Grossbeeren and Schoenefelde via Mahlow. *

25X1A * Comment. The project, which is designed to **bypass** the US Sector of Berlin near Lichtenrade for Soviet Zone rail operations, was reported on previously. See [redacted]
